

Big Dawg's

LEAGUE HANDICAPS

*Oh my Godddd!!
What a body!!
Awesome!!
What a butt!!*

These were just a few words I over heard as I posed, while chalking my cue. Big Dawg takes it all in stride, just like the eye rolling and gasps when we over hear players comparing handicaps.

NEWS FLASH - HARI Christnas are forming in large groups at OK Billiards, Just One More, and Crickets. Reports are now coming in that all areas are being affected!! The parking lot at Bucks Place is wall to wall togas.
The earth is coming to an end!! Fear the grim reaper!!

Did I tell you how cute I am? Even as a puppy, ladies would faint in my presence.

TAP handicaps vs. other leagues handicaps.

It has been stated that TAP handicaps are not accurate. Well Big Dawg, fournisseur masculine of all impressionable ladies must attempt to undo the injustice stated by the few players that in reality are ignorant on what computes a handicap.

80 Algorithms vs. 4.

That's right, 80 vs. 4. According to my obedience school professor, 80 wins.

New for baseball this year. All ERA's this year will be based on your 10 best games.

The baseball commissioner has decided that your 10 best outings is your true ability, and that any other outings just shouldn't count.

Don't get Big Dawg started on Fluke or Slop shots, the old pray and spray mentality. Close your eyes and shoot, hope and pray, strut the table. I'm cool, I'm dude, I'm hip, I'm #1.

Ever try bowling? What computes your handicap?

Strikes, spares, pin count. Next time you're bowling and you get a strike yell Gooooaaalllllll.

Just like the TAP handicap system, you want to count balls made, missed, balls made on the break, and left on the table. If you want accuracy, you have to count what's important. You want to mark balls in pool and innings in baseball. Get the sport right!!

For you impressionable ladies out there, Big Dawg will take a stand against pool player harassment and being hit on all the time. I am willing to devote my time and energy to giving you private lessons on how to avoid it.

We have only scratched the surface on this great debate, so stay tuned for more in the coming months when we again look at the handicap issues.
